Transferring your Themes when Upgrading LinkOne WebView

This document is intended to assist users to upgrade their LinkOne WebView, providing information on how to save and transfer your application data and themes to the new installation.

Upgrading LinkOne WebView

Upgrade LinkOne WebView as follows:

1. On the web server back up the LinkOne website directory, eg www.myparts.com/linkone.
2. Uninstall LinkOne WebView using Add/Remove Programs.
3. Delete any remaining folders in this location.
4. Install the new LinkOne WebView version, ensuring the correct folder, eg linkone, is nominated during the install.
5. Copy over **only** the following folders from the backup to the appropriate locations under the linkone website directory:
 - a. eg Linkone\App_Data
 - b. eg LinkOne\App_Themes
6. Test LinkOne WebView.
